PROFESSIONAL EXPERIENCE

Software Development Engineer II / Frontend Engineer 10/2022 – Present
Airtel Payments Bank Pvt Ltd Gurgaon, India

Fraud Reporting Platform (I4C Government Integration)

- Owned frontend delivery of Airtel Payments Bank's fraud reporting integration with the Indian Cyber Crime Coordination Centre (I4C), enabling customers to raise. cyber fraud complaints directly from the Airtel Thanks App through secure transaction selection, KYC transmission, complaint acknowledgment, and analytics- enabled tracking workflows.
- Built transaction listing and filtering modules for displaying eligible customer transactions spanning the previous six months.
- Developed transaction selection, review, and confirmation workflows to streamline the fraud reporting process and improve customer experience.
- Integrated secure APIs for sharing transaction metadata and customer KYC information with government fraud reporting systems.
- Implemented complaint acknowledgment and reference tracking experiences, including seamless redirection between Airtel Payments Bank and I4C platforms.
- Instrumented comprehensive Google Analytics event tracking across the fraud reporting funnel for user- behavior analysis and business reporting.
- Collaborated with Product Managers, Designers, Backend Engineers, and Compliance teams to deliver regulatory-compliant customer workflows.

Next-Gen Airtel Payments Bank Website (Next.js Platform)

- Spearheaded the frontend architecture of the new enterprise web platform using Next.js, improving page speed and Core Web Vitals.
- Architected Server-Side Rendering (SSR) and lazy-loading strategies that reduced First Contently Paint (FCP) and boosted SEO positioning.
- Engineered a modular content management workflow with Prismic Slice Machine, reducing new feature delivery times by 30%.
- Designed and deployed end-to-end secure authentication, OTP verification, and onboarding workflows integrated with backend microservices.
- Implemented analytical telemetry using Google Tag Manager and Google Analytics to drive data-informed UX optimizations.

WebView Projects & Mono-repo Migration

- Led the migration of 5+ legacy Vanilla JavaScript apps into a unified, type-safe React/TypeScript Mono-repo, maximizing code reuse.
- Delivered scalable, customer-facing WebView platforms including Rewards Hub, Transparent Banking, and WhatsApp Banking.
- Built an enterprise-grade, accessible UI component library and utility suite, saving cross-functional teams dozens of engineering hours per sprint.
- Implemented robust application monitoring systems using Grafana and Kibana to capture runtime bugs and optimize frontend uptime.

Legacy Platform Management (Angular)

- Maintained core customer-facing modules built on Angular, ensuring continuous stability and zero-downtime production updates.
- Collaborated with UI/UX designers to translate high-fidelity Figma specifications into fluid, responsive UI views across mobile and desktop.

Frontend Developer (Freelance Web Developer) 06/2021 – 09/2022
Remote

- Conceptualized and engineered high-performance responsive web applications for global clients using React.js and TypeScript.
- Built secure, serverless database integrations and real-time functions leveraging the Firebase ecosystem.
- Owned client engagement from technical scoping and effort estimation through to production deployment and final asset delivery.

EDUCATION

Masters In Computer Application (MCA) 2022 – 2025
SS International University Online

BSc. (Computer Science) 2017 – 2020
University of Delhi Delhi, India

TECHNICAL SKILLS

Languages
JavaScript (ES6+), TypeScript, HTML5, CSS3, Java (Basic), Python

Frontend Frameworks & Ecosystem
React.js, Next.js (App Router), Angular, Redux Toolkit, Context API, Storybook

Styling & UI
Tailwind CSS, SCSS, Material UI, Bootstrap, Responsive Design, Web Accessibility (a11y)

Tooling, DevOps & CMS
Monorepo Architecture, Git, Bitbucket, Jenkins, Nginx, Kong Gateway, Prismic CMS, Slice Machine

Monitoring & Analytics
Grafana, Kibana, Google Analytics, Google Tag Manager (GTM), SEO Optimization

KEY ACHIEVEMENTS

- Built the foundational customer authentication architecture deployed across Airtel Payments Bank web channels.
- Successfully eliminated massive code duplication by centralizing multi-app webviews into a scalable monorepo structure.
- Developed an internal UI library adopted across multiple distributed development teams to ensure design language consistency.
